

# STACK RITE

*"STACK FAST WITH STACK RITE"*

*The bale alignment holds the front two bales from falling on the front table in hills and rough conditions. It aligns the bales for a consistent, even stack.*

*The receiving table has capabilities of lifting up to 45 degrees, this allows for stacking in tougher climate conditions. This allows the bales to slide easily without having to backup to get them to slide in heavy dew conditions.*

Comfortable and easy operations with a touch screen monitor. Our chassis has an air over spring suspension in the front end, ensuring for the smoothest ride in rough conditions

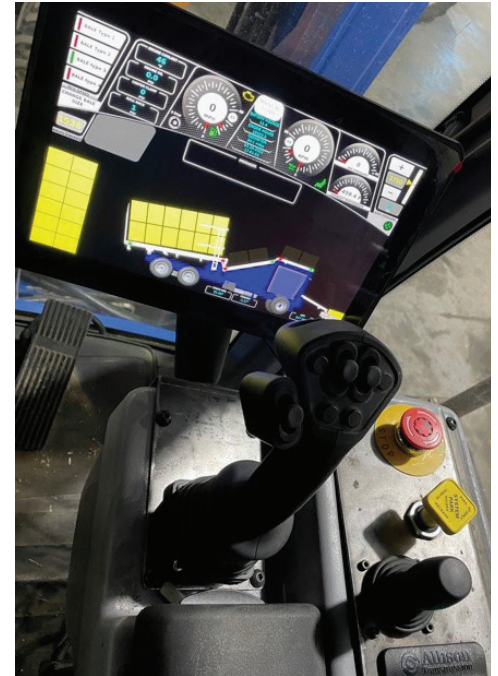

The Cobalt cab allows for enhanced visibility, and comfort for long hours of stacking.

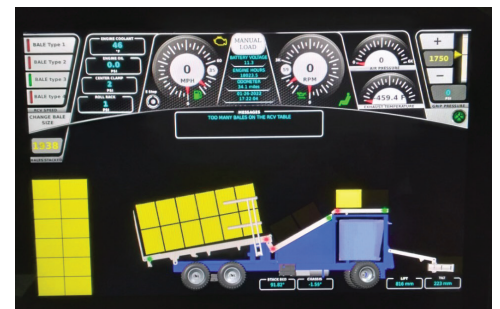

The pushoff pushes on the bottom three bales creating a tighter, straighter stack.

### SPECIFICATIONS

Bale Capacity	12 - 3x4 Bales or 8 - 4x4 Bales
Speed	60 MPH
Field Weight	33,000 LBS
Engine	DEUTZ
Transmission	4000 Allison RDS / 45000 Allison RDS
Steering	Dual Steering Box
Cooling System	Hydac Cooling Package
Fuel Capacity	120 Gal.
Front Axle	22,000 lb.
Front Suspension	Air ride over spring
Front Wheels and Tires	600/55 R22.5
Rear Axle	46,000 lb.
Rear Tires and Wheels	750/45 R22.5
Rear Suspension	Air Link Walking Beam
Driver's Cab	Cobalt Cab - Heat, A/C, AM/FM/USB, Full Size Training Seat,
